

API requirements for the CASINO gambling & sports betting project

Country	Bangladesh
Languages	Bangla, English
Currency	BDT
Server IP	N/A
Temp. Site Address	https://gaming-site-tau-umber.vercel.app/
Gaming Licence	N/A

Project Description

This project is an online casino and sportsbook platform that integrates casino games and sports betting through **NuxtGaming APIs**. The platform maintains full control over user accounts and wallet balances, while NuxtGaming provides game content, sports markets, betting operations, and settlement callbacks. All betting transactions are securely processed through an internal wallet system, ensuring accurate balance management, auditability, and seamless user experience across casino and sports products.

Tech Stack

Backend: Node JS, Socket, Express

Frontend: Next JS

Aggriments

This agreement defines the terms and conditions under which **NuxtGaming** provides casino and sportsbook services to **our platform**.

Under this agreement, NuxtGaming supplies game content, sports data, betting services, and related APIs, while our platform operates as the operator, maintaining full responsibility for user management, wallet balance control, and financial transactions. All player funds are held, managed, and settled exclusively by our internal wallet system.

The agreement covers API usage rights, transaction workflows, revenue sharing or commission structure, data security, compliance obligations, service availability, and audit rights. Both parties agree to follow applicable laws and regulations, ensure secure data exchange, and support reconciliation of betting and gaming transactions.

This partnership enables seamless integration of third-party gaming content while preserving operator control, transparency, and regulatory accountability.
